SKILLS

AI & GenAI

LLMs	RAG	Agentic AI	LangChain
Prompt Eng.	Vector Search	ChromaDB	
Embeddings	Fine-Tuning	MLflow	

Python & ML

Python	TensorFlow	PyTorch	Scikit-learn
Pandas	NumPy	FastAPI	Streamlit

Cloud & Hyperscalers

AWS Lambda	SageMaker	CloudWatch
GCP Vertex AI	BigQuery	Docker
Kubernetes	Terraform	

CI/CD & DevOps

GitHub Actions	CI/CD Pipelines	ELK Stack
Grafana		

Backend & Databases

Node.js	NestJS	REST APIs	GraphQL
PostgreSQL	MongoDB	Redis	

Frontend

React.js	Next.js	React Native	TypeScript
----------	---------	--------------	------------

EDUCATION

M.Sc. Data Science

IU International University of Applied Sciences, Berlin
Oct 2024 – Oct 2025 · Grade: 2.1 (≈ B+ / Distinction)
ML, Deep Learning, Big Data Analytics. Applied TensorFlow & PyTorch for real-world AI projects.

B.Tech Computer Science

Presidency University, Bangalore
Jan 2017 – Dec 2021 · CGPA: 7/10

LANGUAGES

- English — Native
- Kannada — Native
- Hindi — Native

SUMMARY

Gen AI Engineer with 5+ years of experience building production-grade Generative AI systems, Agentic AI pipelines, and cloud-native backends. Hands-on expertise in LLM application development (GPT, Claude, Gemini), RAG architectures, vector search, prompt engineering, and fine-tuning using Python and LangChain. Experienced deploying GenAI workloads on AWS (SageMaker, Lambda) and GCP (Vertex AI) with CI/CD pipelines and containerized microservices. M.Sc. in Data Science with deep foundations in ML, deep learning, and NLP. Background spans healthcare, fintech, and enterprise consulting — shipping GenAI products from prototype to production.

EXPERIENCE

AI & Cloud Solutions Engineer

KRElixir · Bangalore

Jan 2026 – Present

Global digital transformation partner delivering cloud, AI/ML, and data-driven solutions for enterprise clients.

Architected and deployed Agentic AI workflows automating multi-step enterprise processes, reducing manual intervention by integrating LLM reasoning with tool-use pipelines.

Built end-to-end GenAI applications on AWS (Lambda, SageMaker) with CI/CD pipelines using GitHub Actions for automated model deployment and regression testing.

Designed scalable data pipelines on GCP (Vertex AI, BigQuery) enabling real-time predictive insights for enterprise clients.

Containerized AI inference services using Docker and Kubernetes, supporting zero-downtime deployments across cloud environments.

Gen AI Engineer

AiraDoc · Berlin, Germany

Aug 2025 – Nov 2025

Healthtech startup building cloud-native platforms and AI-driven tools for digital healthcare delivery.

Designed and deployed RAG pipelines using LangChain and ChromaDB for context-aware querying of unstructured medical records, improving retrieval accuracy significantly.

Built Agentic AI workflows for document understanding — enabling autonomous extraction, classification, and summarization of healthcare documents using LLMs.

Developed vector search systems using ChromaDB and embeddings for semantic retrieval across structured and unstructured healthcare data.

Implemented scalable backend AI inference services with FastAPI and NestJS, integrated with CI/CD pipelines for continuous model updates.

Consultant

Deloitte · Bengaluru

Nov 2023 – Jul 2024

Global consulting firm delivering digital transformation for enterprise clients.

Led API strategy and infrastructure planning for the Titan Project — a large-scale cloud migration initiative with ML-extensible architecture.

Delivered core modules for the VGuard Project, including a real-time notification system and expense tracker using distributed systems on Node.js.

Designed backend systems for high-volume event stream processing, laying the data foundation for AI-driven analytics and automation.

Full Stack Developer

BHIVE Alts · Bengaluru

Jun 2022 – Nov 2023

Fintech platform offering alternative investment opportunities.

Built the BHIVE Alts investment platform; developed a payment module that generated ₹6 Cr in revenue within 3 months of launch.

Designed analytics-driven dashboards integrating financial data modeling and ML-based performance insights.

Led transition to TypeScript, improving code quality and reducing production bugs by 50% across algorithm-heavy business logic.

Software Engineer

Webbirth · Bangalore

Sep 2021 – Jun 2022

Product development agency for cross-platform e-commerce and mobile apps.

Developed e-commerce mobile apps using React Native and Flutter with full checkout functionality.

Designed robust backend services using Laravel and Node.js, enhancing system reliability by 25%.

Delivered multiple client projects on time while adapting to rapidly evolving requirements.

KEY ACHIEVEMENTS

Founded **Tranna**, a road safety rewards startup incubated at **IIM Bangalore NSRCEL** — built on React Native + FastAPI with GPS-based Agentic scoring and real-time trip analysis.

Advanced to the final audition round of **Shark Tank India Season 1**, pitching an AI-driven road safety product built from scratch.

Contributed to infrastructure supporting **₹6 Cr.** in annual investor capital at BHIVE Alts.

Led **TypeScript adoption** at BHIVE Alts, reducing production bugs by **50%**.

Published research in IJCRT: **"Ride-Along Application"** — Paper ID: IJCRT2106046.
