SUMMARY

Full-stack professional with over 5 years of experience in back-end and front-end development, expert in serverless micro-services on AWS and crafting UIs with React/Next.js. My key achievements include streamlining deployment processes that reduced production release times by 50% and implementing scalable serverless architectures for high-traffic applications. Seeking a Full-Stack Engineer position at eduBITES, where I bring my comprehensive development skills to support your mission of reshaping corporate education by transforming knowledge into engaging learning experiences with AI.

KEY ACHIEVEMENTS

- Improved UI responsiveness by 40% through component refactoring and performance optimization
- Generated ₹6 Cr in revenue within 3 months by developing an in-app payment module.
- Reduced production bugs by 50% by driving adoption of TypeScript across engineering teams.
- Built scalable frontend interfaces used by thousands of investors monthly.

EXPERIENCE

Co-Founder & CTO

Tranna (IIM Bangalore-incubated)

01/2021 - Present

Bengaluru, Karnataka, India

Startup rewards safe driving with gamified incentives and insurance-based tracking.

- Designed and launched backend capable of processing 100K+ driving data points daily, enabling real-time user scoring and reward logic.
- Developed cross-platform mobile app with React Native; integrated real-time APIs and dashboards.
- Built CI/CD pipeline reducing deployment time by 40% across environments.
- Achieved IIM Bangalore incubation in under 6 weeks, positioning Tranna for pilot partnerships with insurers.

EXPERIENCE

VP of Technology

Aulosa

05/2022 - 01/2024 Berlin, Germany

Aulosa is a music distribution and marketing startup helping independent artists and labels manage their releases, grow their audience, and monetize their content globally.

- Led the end-to-end development of Aulosa's core platform using React, Node.js, and AWS, aligning technical execution with business goals.
- Brought a product-first mindset, collaborating directly with the CEO to prioritize features based on artist needs and market feedback.
- Built and mentored a lean engineering team while establishing workflows with TypeScript, CI/CD pipelines, and scalable infrastructure.
- Delivered music catalog dashboards, campaign tracking tools, and backend services for content distribution and performance analytics.

Consultant

Deloitte

11/2023 - 07/2024 Bengaluru, Karnataka, India

Global consulting firm delivering digital transformation for enterprise clients.

- Defined API and infrastructure architecture for the Titan Project serving **multiple enterprise clients across 3 countries**.
- Delivered VGuard's internal app suite that improved employee tracking/reporting efficiency by **35%**.
- Created technical documentation that reduced handover delays by **60%** during transitions.
- Integrated with DevOps to cut CI/CD pipeline failures by **25%** using Docker-based container optimization.

Full Stack Developer

BHIVE Alts

06/2022 - 11/2023 Bengaluru, Karnataka, India

A fintech platform offering alternative investment opportunities.

- Led development of investor dashboard used by **5,000+ active users**, resulting in increased investor engagement and retention.
- Developed payment module that generated **₹6 Cr (~€660K) in revenue in 3 months**.
- Migrated platform to TypeScript and modular architecture, reducing bugs by **50%** and improving developer onboarding time by **30%**.
- Mentored 2 interns, improving team delivery throughput by **20%**.

Software Engineer

Webbirth

09/2021 - 06/2022 Bangalore Urban, Karnataka, India

Product development agency for cross-platform e-commerce and mobile apps.

- Increased mobile app sales revenue by {40%} using React Native and Flutter for full e-commerce checkout development.
- Designed robust backend services using **Node.js** and **Laravel**, enhancing system reliability by 25%.
- Delivered multiple client projects on time while adapting to rapidly evolving requirements.

EDUCATION

Master's degree, Data Science

IU International University of Applied Sciences

10/2024 - 10/2025 Berlin, Germany

- Gained expertise in statistical analysis, machine learning, deep learning, and data visualization to tackle real-world data challenges.
- Focused on applying predictive TensorFlow modeling and big data analytics for data-driven decision-making.

Bachelor of Technology - BTech, Computer Science

Presidency University, Bangalore

01/2017 - 12/2021 Bangalore, India

- Built a strong foundation in programming, algorithms, and software development principles.
- Developed problem-solving skills and technical proficiency through hands-on project work.
