SUMMARY

Full-stack development professional with 5 years of experience in frontend and backend engineering, expert in AWS cloud-native solutions and AI integration. Key achievements include leading the discovery phase of Deloitte's Titan Project, defining critical infrastructure and API strategies, and contributing to raising \$69.7 million in annual investor capital through the optimization of the BHIVE Alts investment platform. Seeking a Sr DevOps Engineer position at an IT Services & Consulting company in Malaysia, where my engineering and cloud infrastructure management skills will support your mission of providing scalable and reliable IT solutions.

EXPERIENCE

Full Stack Developer

AiraDoc

📅 08/2025 - 11/2025 📍 Berlin, Germany

Airadoc is a Berlin-based healthtech startup building cloud-native platforms and AI-driven tools to improve digital healthcare delivery.

- Designed and implemented scalable front-end applications using Angular, React.js and Next.js, ensuring smooth and responsive user experiences across cloud-native platforms.
- Developed and optimized back-end services with Node.js and NestJS, reducing response times and enhancing system reliability.
- Integrated cloud-native solutions on AWS with Docker and Kubernetes for seamless deployment and scalability.
- Built and managed secure APIs to streamline interoperability between healthcare systems.
- Collaborated with cross-functional teams to deliver end-to-end product features, improving overall development speed and quality.

Consultant

Deloitte

📅 11/2023 - 07/2024 📍 Bengaluru, Karnataka, India

Global consulting firm delivering digital transformation for enterprise clients.

- Led infrastructure and API strategy for the **Titan Project**, ensuring accurate discovery-phase planning including the budget.
- Delivered core modules for the **VGuard Project**, including a real-time notification system and expense tracker using distributed systems.
- Authored detailed technical documentation to support maintainability and knowledge sharing.
- Worked cross-functionally with DevOps and frontend teams for seamless system integration.

Full Stack Developer

BHIVE Alts

📅 06/2022 - 11/2023 📍 Bengaluru, Karnataka, India

A fintech platform offering alternative investment opportunities.

- Built the BHIVE Alts investment app, improving investor engagement and transaction efficiency.
- Developed a payment module that generated ₹6 Cr in revenue within 3 months of launch.
- Led transition from JavaScript to **TypeScript**, increasing overall code quality and test coverage.
- Mentored 2 interns on internal dashboard tools, ensuring production-ready deliverables.

Software Engineer

Webbirth

📅 09/2021 - 06/2022 📍 Bangalore Urban, Karnataka, India

Product development agency for cross-platform e-commerce and mobile apps.

- Developed e-commerce mobile apps using **React Native** and **Flutter** with full checkout functionality.
- Designed robust backend services using **Laravel** and **Node.js**, enhancing system reliability by 25%.
- Delivered multiple client projects on time while adapting to rapidly evolving requirements.

EXPERIENCE

Full Stack Developer (Intern)

Civil Engineering System

📅 06/2020 - 07/2021 📍 Bangalore Urban, Karnataka, India

Internal tools for construction and infrastructure management.

- Created modular UI components and backend services using **PHP** and **React.js**.
- Implemented improvements in customer-facing dashboards for enhanced UX.
- Promoted team collaboration through regular code reviews and shared documentation practices.

EDUCATION

Master's degree, Data Science

IU International University of Applied Sciences

📅 10/2024 - 10/2025 📍 Berlin, Germany

- Gained expertise in analysis, machine learning, deep learning, and data visualization to tackle real-world data challenges.
- Focused on applying predictive TensorFlow modeling and big data analytics for data-driven decision-making.

Bachelor of Technology - BTech, Computer Science

Presidency University, Bangalore

📅 01/2017 - 12/2021 📍 Bangalore, India

- Built a strong foundation in programming, algorithms, and software development principles.
- Developed problem-solving skills and technical proficiency through hands-on project work.
